

Q-change Photochromic Lenses

The new photochromic generation greatly improves the speed and performance. Faster changing and Quicker fading, up to maximum 85% darkness.

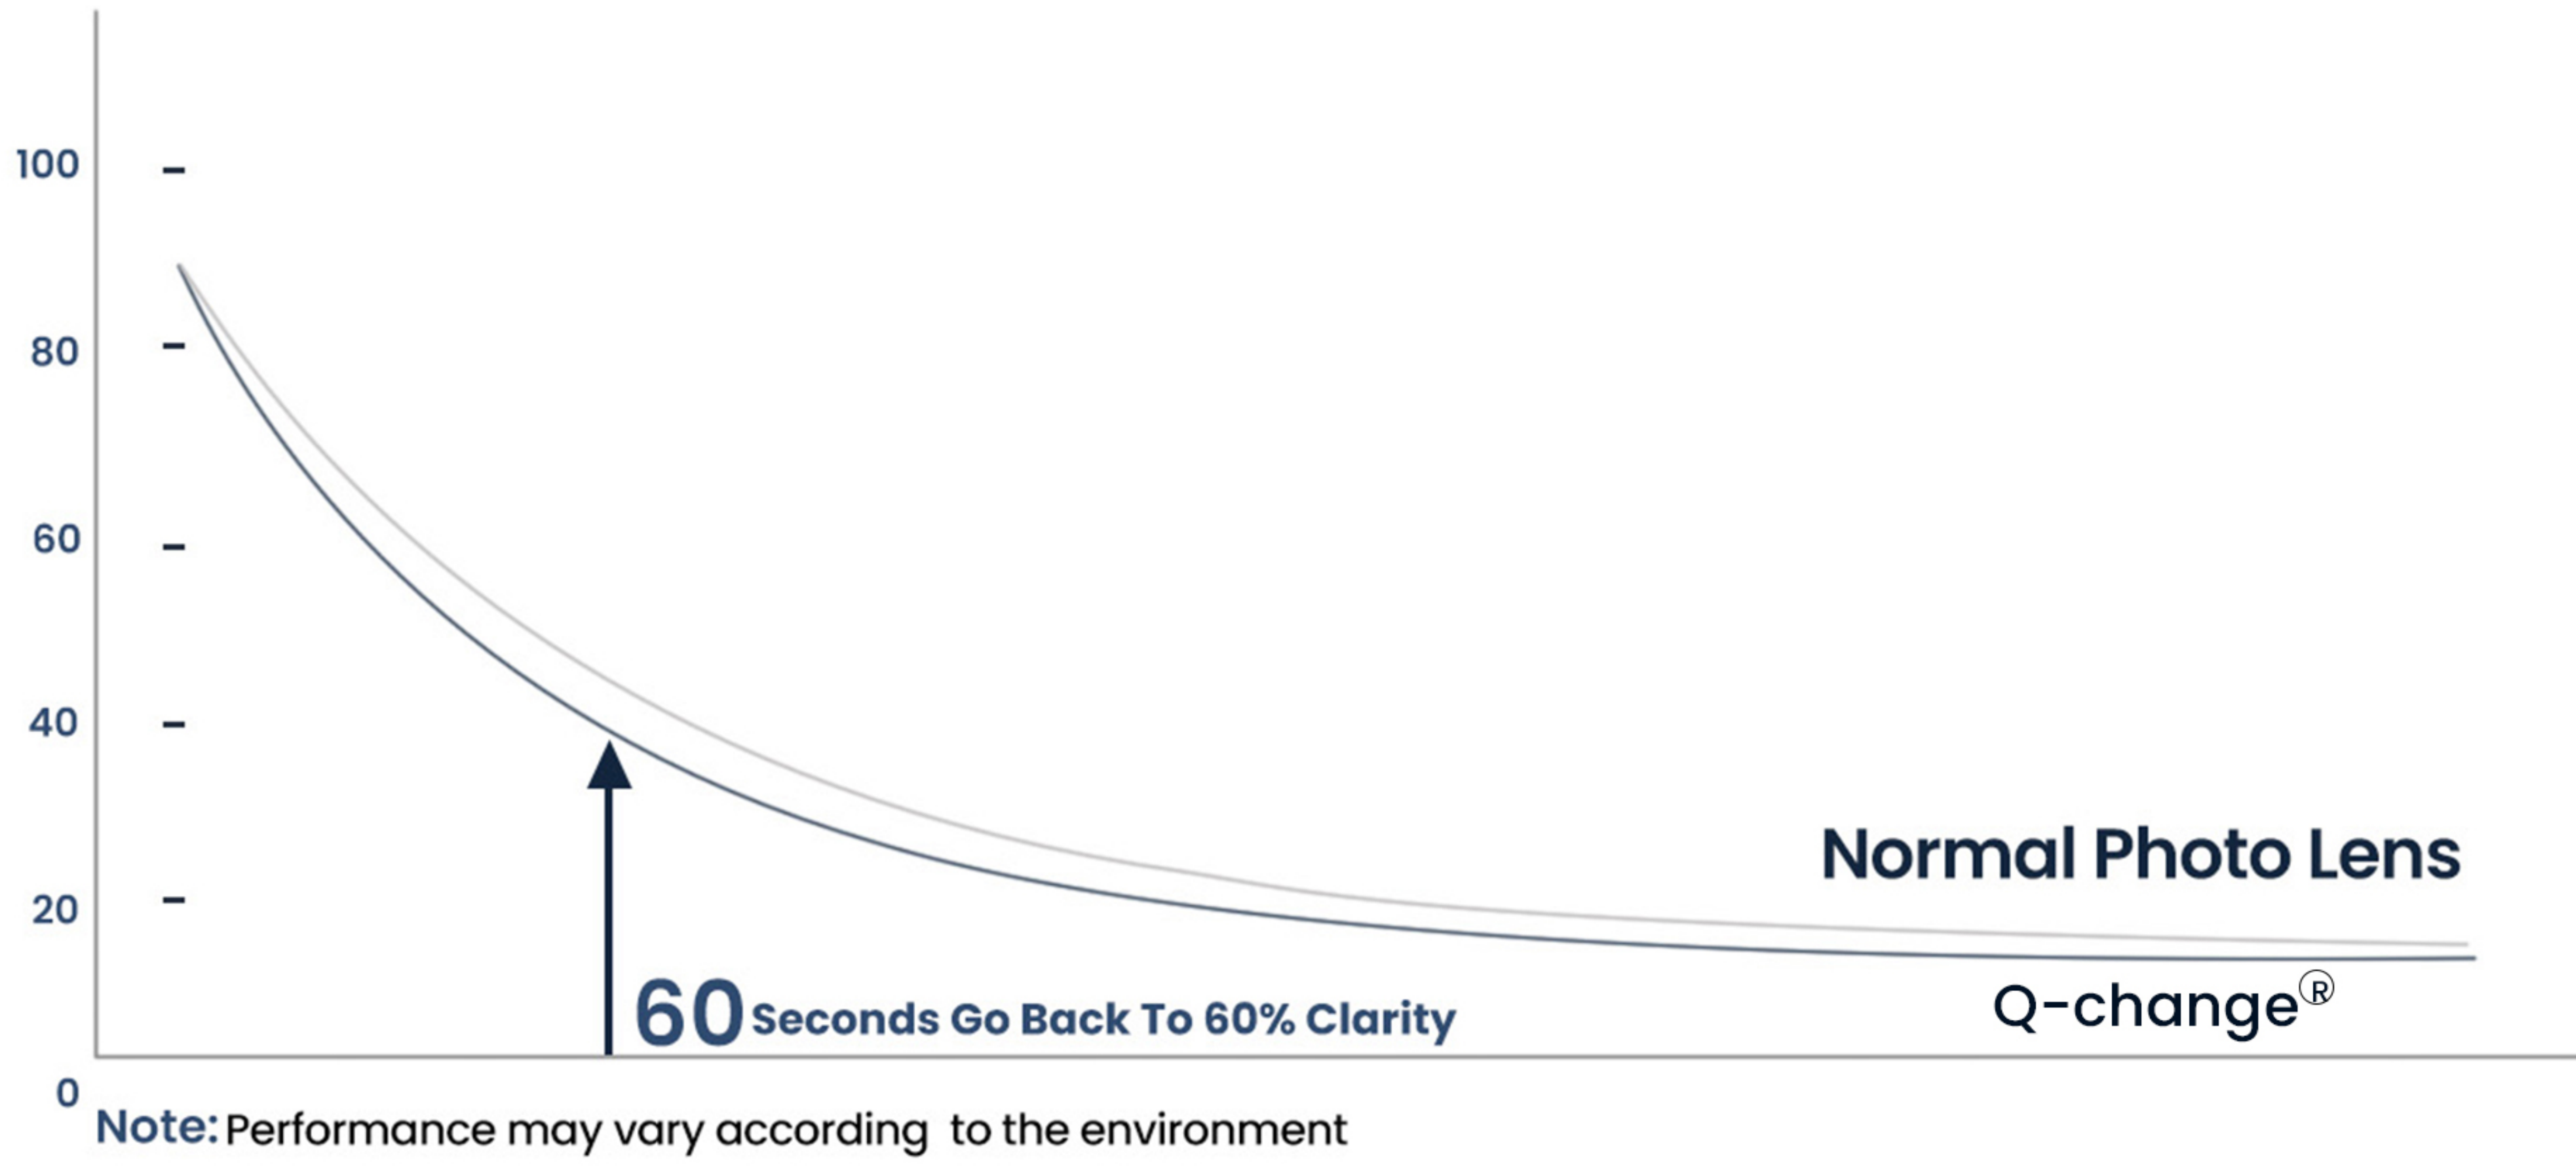

Fast Changing Speed

Outside, a fast color darkening is essential for immediate protection.

Quick Fading Speed

Inside, we want to return to our normal visual mode without waiting too long, and thus need a transparent base color to guarantee a sharp vision. Q-change® achieves this fast change back providing better clarity of vision and cosmetic advantages whilst indoors.

Full UV Protection

Sight is essential sense and our eyes are fragile. Our Q-change® Photochromic lens provides a 100% UV rays protection for your eyes whilst reducing glare from the sun when outdoors.

Tremendous Comfort

How comfortable it is just to forget that we are wearing photochromic lenses. They simply adapt to all situations of your life, and protect you all the time. Experiencing our Q-change® is adopting a new comfort in life.
